

## LIFTING SLINGS

Hercules now carries new synthetic web lifting slings which are primarily composed of nylon. Our lifting slings are a soft and flexible solution to rigging and are offered in endless and eye to eye styles. All of the synthetic web slings are constructed with 9800 lbs. heavy duty webbing, and are in full compliance with current ASME B30.9 standards, with a 5:1 design factor.

Nylon web slings with flat eye to eye loops are one of the most popular straps for lifting because of their versatility; they can be used in a choker, basket or vertical hitch. The design also makes it easy to remove from underneath a load.
